EDUCATION

Sandip University, Nashik

Bachelor of Technology (B.Tech) in Computer Science Engineering (AI & ML)

Aug 2024 – Present

Tirumala Junior College, Visakhapatnam

Intermediate (MPC)

Expected Graduation: June 2028

2022 – 2024

Percentage: 96.7%

TECHNICAL SKILLS

Languages: Python, C, C++, SQL

Web Development: HTML, CSS, JavaScript, Django, Flask, REST APIs

Libraries / AI: NumPy, OpenCV, TensorFlow, Keras, Scikit-learn

Databases & Tools: MySQL, SQLite, XAMPP, Git, GitHub, VS Code, Linux/WSL

Core Concepts: Machine Learning, Deep Learning, DBMS, Data Structures & Algorithms, CRUD Operations, Data Preprocessing, Model Training

EXPERIENCE

IntrnForte

Jul 2026 – Sep 2026

Artificial Intelligence Intern

Remote

- Completed a 10-week Artificial Intelligence internship focused on Python, Artificial Intelligence, ChatGPT, and project-based learning.
- Applied AI concepts to practical projects while strengthening programming, analytical, and problem-solving skills.

CodeAlpha

Jul 2026 – Jul 2026

Full Stack Development Intern

Remote

- Developed responsive and user-friendly web applications using HTML, CSS, JavaScript, Python, Django, SQL, and Git/GitHub.
- Implemented frontend and backend functionality with database integration, CRUD operations, debugging, and problem-solving.

PROJECTS

Breast Cancer Prediction System | *Python, Scikit-learn, Flask*

- Developed a machine learning classification system to predict benign or malignant breast tumors using diagnostic features.
- Performed data preprocessing, feature selection, model training, and evaluation and integrated the trained model with Flask.

AI Customer Insurance Prediction | *Python, Scikit-learn, Flask, Pandas*

- Built a classification system to predict insurance purchase based on customer age and estimated salary.
- Compared Logistic Regression, KNN, SVM, Decision Tree, and Random Forest and deployed the prediction model using Flask.

Handwritten Digit Recognition | *Python, TensorFlow, Keras, Flask*

- Developed an MNIST-based web application to recognize handwritten digits from 0–9 using a trained deep learning model.
- Implemented image preprocessing, 28×28 resizing, normalization, prediction, and confidence scoring through Flask.

Language Translator | *Python, Flask, HTML, CSS*

- Developed a web application for translating text between multiple languages using an interactive user interface.
- Implemented language selection, text input, translation output, and Flask backend integration with a translation service/API.
