EDUCATION

Sandip University, Nashik

Bachelor of Technology (B.Tech) in Computer Science Engineering (AI & ML)

Aug 2024 – Present

Tirumala Junior College, Visakhapatnam

Intermediate (MPC)

Expected Graduation: June 2028

2022 – 2024

Percentage: 96.7%

TECHNICAL SKILLS

Languages: Python, C, C++, SQL

Web Development: HTML, CSS, Django, Flask, REST APIs

Libraries / AI: NumPy, OpenCV, TensorFlow, Keras

Databases & Tools: MySQL, SQLite, XAMPP, Git, GitHub, VS Code, Linux/WSL

Core Concepts: DBMS, Data Structures & Algorithms, CRUD Operations, File Handling, REST APIs

EXPERIENCE

CodeAlpha

Jul 2026 – Jul 2026

Full Stack Development Intern

Remote

- Developed responsive and user-friendly web applications as part of a virtual Full Stack Development internship.
- Worked with HTML, CSS, JavaScript, Python, Django, SQL, and Git/GitHub for full-stack application development.
- Implemented frontend and backend functionality with database integration and CRUD operations.
- Applied debugging and problem-solving skills while developing real-world software projects.

PROJECTS

Handwritten Digit Recognition | Python, TensorFlow, Keras, Flask

- Developed a machine learning web application that recognizes handwritten digits from 0–9.
- Built a Flask-based interface for image upload and automated digit prediction with confidence scoring.
- Implemented image preprocessing including grayscale conversion, color inversion, 28×28 resizing, normalization, and model-ready formatting.
- Integrated the trained MNIST model with Flask to process uploaded images and return predicted digits with confidence percentages.

Language Translator | Python, Flask, HTML, CSS

- Developed a web-based application for translating text between multiple languages through an interactive user interface.
- Implemented source and target language selection, text input, translation output, and responsive frontend components.
- Built a Flask backend to process translation requests and connect the application with a translation service/API.
- Designed a clean and responsive interface for convenient translation across desktop and mobile devices.

E-Commerce Store | Django, Python, HTML, CSS, SQLite

- Developed a full-stack e-commerce web application with product browsing, authentication, cart, and checkout functionality.
- Implemented product listing, product details, user registration/login, shopping cart, and order processing modules.
- Integrated SQLite database storage for users, products, cart items, and customer orders.
- Built responsive frontend pages and integrated Django authentication and administration features.

Social Media Platform | Django, Python, HTML, CSS, SQLite

- A Django-based social media platform supporting user registration, authentication, posts, comments, and user connections.
- Implemented image-based post creation, commenting, and follow/unfollow functionality using Django models and views.
- Designed responsive web pages with HTML and CSS and integrated Django's authentication and admin features.
- Structured relational data using models for users, profiles, posts, comments, and follower relationships.
